School supply or school wish list?

The kids gobble up graphic novels and I am always needing to add new ones to my classroom collection. As for other supplies, I am good right now (beginning of the year), but will let you know as needs arise.

When is your birthday? *

February 19

Comments

I love fun and unusual earrings and they do not have to be expensive. They are something that kids can have fun picking!

While I do not want this broadcasted everywhere (in case I am not successful!), I am trying to lose weight, so would prefer to receive "healthier snacks." I know that's not very fun.

Also, my most favorite gifts of all time are notes that the children write to me.
